A World Exist in an Aquarium

Crafted Ecosystems

Curated for your Space

NATURE AQUARIUM

To know Mother Nature is to love her smallest creations.

We recreate the natural eco-system in our aquarium, which leads to a better understanding of the global environment.

Create Nature

NATURE IN THE GLASS

HEAVENLY FOREST

The Misty World

Running down the wall, the mist enfolds tropical plants gently and invites us to the world of fantasy.

Recreates the Natural Feel of Moss and Grass Grown on Water-Dripping Rock Wall

In mountains and along streams, we often spot the places where mosses and ferns grow on a rock wall over which water is spilling down. WABI-KUSA WALL reproduces the natural feel of such a rock wall.

MINI_NA

Mini NATURE AQUARIUM

DOOA, an inspiring brand, helps you enjoy aquatic plants more freely. Minimal and easy, and designed as a platform allowing everyone to nurture plants indoors. Feel closer to nature, and bring beauty into your life.

Have a fun with epiphytes and Neo Glass Air

DOOA PALUDARIUM

Paludarium with DOOA is full-fledged, having aquatic plants and jungle plants in small aquarium tanks that can be simply placed on a desk. Let's create your own Paludarium with your favorite plants.

**ENJOY
"DOOA"!**

DOOA, an inspiring brand, helps you enjoy aquatic plants more freely. Minimal and easy, and designed as a platform allowing everyone to nurture plants indoors. Feel closer to nature, and bring beauty into your life.

New way to enjoy plants

TERRA BASE

BOOK, an inspiring brand, helps you enjoy aquatic plants.
With fresh, diverse and easy-to-grow plants, it provides the
platform allowing everyone to nurture plants indoors.
Feel closer to nature, and bring beauty into your life.

Thinking about the Foggy Jungle

This layout was created in the image of a valley in a tropical rainforest by using Wabi-Kusa Mat with only epiphytic plants, and intentionally without using any Wabi-kusa. *Bucephalandra* sp. is a plant that we can enjoy in both emersed and submersed environments and it often stimulates the aquatic plant hobbyists' desire to collect. *Bucephalandra* is an ideal plant for this type of layout, but it requires a special trimming care. It is important to cut off the old or damaged leaves because they easily decay if left untrimmed. This style of layout tends to give a dark impression due to Willow moss used as its base. To avoid this, *Microsorium* and Java Fern in bright color were attached as an accent to make a good contrast of light and dark. In dry environments, it is recommended to use broader-leaf type of *Microsorium* having a relatively good tolerance to dehydration. For underwater portion, Moss Rocks and Tropical River Soil are used to evoke an image of tropical mountain stream. Moss Rocks were placed right in front of the wall surface and *Bucephalandra* was attached between the rocks so that a unity is created in the arrangement. By placing *Bucephalandra* in both emersed and submersed portions, a seamless flow was created in the vertical direction. Finally, a subtle and profound rock wall covered by epiphytic plants was created.

DOO, an inspiring brand, helps you enjoy aquatic plants more freely. Minimal and easy, and designed as a platform allowing everyone to nurture plants indoors. Feel closer to nature, and bring beauty into your life.

Enjoy Jungle Plants Freely

SYSTEM PALUDA

システムパルダ

Enjoying scenery captured from nature anytime in your room.

It satisfies your desires for Mother Nature and leads you to understand how precious nature is.

Welcome to small nature.
